MOMENTUM STEREO AMPLIFIER & MOMENTUM ULTRA-ANALOG PREAMPLIFIER

Audiophiles know Dan D'Agostino as the world's most skilled and passionate designer of high-powered solid-state audio systems. His **MOMENTUM** Monoblock Amplifier—a 300 watt tour de force—has been met with accolades by critical listeners worldwide. And now, Dan introduces two new additions to the Momentum series. The Momentum Stereo Amplifier delivers 200 watts per channel and is factory upgradable to Monoblock configuration for ultimate system flexibility. The new Momentum Ultra-Analog Preamplifier is a revelation in low-level signal amplification, and the perfect complement to the Momentum amplifiers.

With the **MOMENTUM** series, revolutionary concepts in amplification employ innovative materials and a fresh-slate design. The Momentum amplifiers draw less than 1 watt of power at idle despite their impressive output, and are stable at high frequencies into the lowest-impedance speakers. Efficient cooling is achieved with venturi-equipped copper heat sinks whose beauty matches their function. And true to Dan's obsession with perfection, every detail of the Momentum series—from preamplifier controls to power meters—establishes a new benchmark for build quality in the high-end arena.

“It may, perhaps, be the best amp on the planet.”

—Ken Kessler, *Hi-Fi News & Record Review*, July 2011
